La finitura CORTEN (argento o marrone) è un procedimento di ossidazione naturale. La realizzazione di tale processo è influenzata dal livello di umidità, dalla temperatura esterna e da altre variabili ambientali. La mano dell'uomo e la specifica lavorazione sono il valore aggiunto che testimonia l'autentico "Made in Italy". Come in tutte le opere dove il procedimento non è meccanico ma artigianale le eventuali variazioni di colore non sono da considerarsi un difetto ma testimonianza dell'unicità del prodotto. La finitura Corten rende quindi il prodotto unico e irripetibile. Le foto presenti nel nostro catalogo costituiscono solo un'indicazione del tipo di prodotto e non rappresentano un campione degli stessi. The finish Corten (Silver or Brown) is the result of a procedure of natural oxidation. The procedure is every time affected by the percentage of humidity in the air, by the external temperature and by other environmental variables. Hands of man and a special processing are a value added, which is evidence of the real "Made in Italy". As in all works where the procedure is not mechanical but handcrafted, variations are possible, but they must not be considered as a defect, but rather as a proof of the uniqueness of the product. Corten finish makes the product as unique, since every result is not reproducible in identical way. The pictures of our catalogues are only an example of the kind of the product, but they cannot be considered strictly as samples of them, since the result can be different.

La finitura CORTEN (argento o marrone) è un procedimento di ossidazione naturale. La realizzazione di tale processo è influenzata dal livello di umidità, dalla temperatura esterna e da altre variabili ambientali. La mano dell'uomo e la specifica lavorazione sono il valore aggiunto che testimonia l'autentico "Made in Italy". Come in tutte le opere dove il procedimento non è meccanico ma artigianale le eventuali variazioni di colore non sono da considerarsi un difetto ma testimonianza dell'unicità del prodotto. La finitura Corten rende quindi il prodotto unico e irripetibile. Le foto presenti nel nostro catalogo costituiscono solo un'indicazione del tipo di prodotto e non rappresentano un campione degli stessi.

The finish Corten (Silver or Brown) is the result of a procedure of natural oxidation. The procedure is every time affected by the percentage of humidity in the air, by the external temperature and by other environmental variables. Hands of man and a special processing are a value added, which is evidence of the real "Made in Italy". As in all works where the procedure is not mechanical but handcrafted, variations are possible, but they must not be considered as a defect, but rather as a proof of the uniqueness of the product. Corten finish makes the product as unique, since every result is not reproducible in identical way. The pictures of our catalogues are only an example of the kind of the product, but they cannot be considered strictly as samples of them, since the result can be different.
